

#GSCGiving

## MEET MAMA MWANJALA

Mama Mwanjala is a home gardener in rural Tanzania where malnutrition and child stunting is common. She, like many Tanzanians, faces difficulties having reliable sources of water necessary for her garden. With the help of GSC's [Sustainable Agriculture Program](#), Mama Mwanjala has a water catchment "hafir," giving her the confidence in having a steady supply of water for growing vegetables. GSC has also provided gardening and nutrition knowledge to sustain her family and the confidence to transform her garden into a community learning center.

With your help, we can spark change for home gardeners like Mama Mwanjala across Tanzania. Your help is also needed to assist at-risk communities in [Cambodia](#) supported by GSC. Give confidence this holiday season. Your **tax-deductible** donation makes a difference.
